

Gatter & Diehl Consulting Engineers

100 Winding Creek Boulevard
Mechanicsburg, Pennsylvania

Est. 1946 | Licensed in 19 States

Professional Company

Gatter & Diehl is headquartered in Mechanicsburg, Pennsylvania and provides premiere level engineering services throughout the building construction industry. Gatter & Diehl was established in 1946 and is active and licensed in 19 states. Specialties include cost effective energy saving solutions for new builds, renovations and retrofits.

Their construction engineering and design services are specialized in systems such as; Heating, Ventilation, Air Conditioning, Controls, Lighting, Power, Telecommunications, Plumbing and Fire Protection.

Services typically include; programming and preliminary review of systems, preparation of design documents, drawings, specifications, investigation, site surveys, reports, studies, construction observation, shop drawing review, operating and life cycle cost analysis, commissioning, energy modeling, plus digital archiving and facility management document services.

Green Building Design

Gatter & Diehl's offices specialize in applying energy efficient sustainable design and employs this philosophy on all projects for all clients while balancing cost and value, with sustainability.

By employing senior USGBC certified staff, ASHRAE certified staff, energy conscious designers, certified energy modelers and technicians on projects, all clients are ensured of quality, modern, energy efficient systems design closely integrated to support the owner and the architects design.

Gatter & Diehl energy projects have been recognized by the state of Pennsylvania through the Governors Award for Environmental Excellence.
